

Seminars at Wilhelminenberg Winter 2017/18

Guests are welcome!

October		04.10.	CANCELLED!! VERONIKA SEXL	Institute of Pharmacology and Toxicology, University of Veterinary Medicine, Vienna, A	CDK6: novel functions for an old cell cycle kinase
		11.10.	MICHAELA SKUBAN	Functional Morphology of Animals, Dep. II, Faculty of Biology, Ludwig-Maximilians-Universität München, DE	Bears among people: Human influence on diet, habitat selection, and road crossing behaviour of the brown bear (<i>Ursus arctos</i>) in central Slovakia
		18.10.	ANDREA FULLER	School of Physiology, University of the Witwatersrand, Johannesburg, ZAF	From aardvarks to zebras: understanding how large mammals will respond to heat and aridity associated with climate change
		25.10.	CHRIS GUGLIELMO	Dep. of Biology, Advanced Facility for Avian Research, University of Western Ontario, London, ON, Canada	Endurance flight physiology of migratory birds and bats
November		08.11.	LEITH MEYER Special Term: 10:00 a.m.	Dep. of Paraclinical Science, Faculty of Veterinary Sciences, University of Pretoria, ZAF	Misconceptions about capture-induced hyperthermia
		08.11.	MELANIE DAMMHAHN	Institute for Biochemistry and Biology, University of Potsdam, DE	From individuals to community ecology: how individual differences might matter for ecological interactions
		15.11.	HERIBERT HOFER	Leibniz Institute for Zoo and Wildlife Research (IZW), DE	Despotic behaviour amongst relatives: selfish spotted hyena siblings, Hamilton's rule, and the consequences for health and fitness
		22.11.	CHRISTIAN VOIGT	Leibniz Institute for Zoo and Wildlife Research, Dep. of Evolutionary Ecology, DE	Moving across anthropogenic landscapes: Big challenges and few opportunities for bats
		29.11.	CARSTEN NOWAK	River Ecology and Conservation, Senckenberg Research Institute and Natural History Museum Frankfurt, DE	Genetic reconstruction of large carnivore returns to central Europe
December		06.12.	VERONIKA SEXL	Institute of Pharmacology and Toxicology, University of Veterinary Medicine, Vienna, A	CDK6: novel functions for an old cell cycle kinase
		13.12.	NIR SAPIR	University of Haifa, Dep. of Evolutionary and Environmental Biology, ISR	Causes, patterns and consequences of wing morphological deficits in birds: Bio-mechanical, ecological and evolutionary aspects
January		10.01.	RON PINHASI	Department of Anthropology, University of Vienna, A	To be announced
		17.01.	LUISE KRUCKENHAUSER	Central Research Laboratories, Natural History Museum Vienna, A	Blind cave fish and cryptic species – the genus <i>Garra</i> (Cyprinidae) in Oman
		24.01.	GIL ROSENTHAL	Texas A & M University, Dep. of Biology, Texas, USA	Mate choice and the evolutionary process in swordtails (Teleostei: <i>Xiphophorus</i>)
		31.01.	STEFANIA CASAGRANDE	Max Planck Institute for Ornithology, Research Group Hau, Seewiesen, DE	From cells to populations to understand life-history trade-offs mediated by hormones

Forschungsinstitut für Wildtierkunde und Ökologie, 16., Savoyenstraße 1

Konrad Lorenz-Institut für Vergleichende Verhaltensforschung, 16., Savoyenstraße 1

When: Wednesdays at 16:00 c.t. / 16:00 Start with Coffee and Tea.

Where: The institutes are located opposite of Schloss Wilhelminenberg in the 16th district of Vienna. The seminars will take place at the "Seminarraum" at the Forschungsinstitut für Wildtierkunde und Ökologie (Research Institute of Wildlife Ecology).

How to get here:

Streetcar (2, 10, 44, 46) or train S45 or underground (U3) to station Ottakring, then bus 46A or 46B to "Wilhelminenberg".
