COSB COLLOQUIUM

Centre for Organismal Systems Biology

Winter Term 2019/2020

Mondays, 11:15 am; Seminar Room 3, UZA 1, Althanstraße 14, Vienna

- Oct. 07** **Brian OLIVER** The National Institute of Diabetes and Digestive and Kidney Diseases, Bethesda, MD, USA
X chromosome inactivation in the *Drosophila* germline
- Oct. 14** **Cristina GONZÁLEZ-ESTÉVEZ** Leibniz Institute on Aging – Fritz Lipmann Institute, Jena, GER
Stem cells on diet: how planarians regenerate under starvation
- Oct. 28** **Darren GRIFFIN** Centre for Interdisciplinary Studies of Reproduction, University Kent, UK
Jurassic Spark: Studying the genome structure of birds and other dinosaurs
- Nov. 04** **Gert WÖRHEIDE** Ludwig-Maximilians-Universität München, GER
Comparative (phylo)genomics of non-bilaterian animals
- Nov. 18** **Tom GILBERT** The GLOBE Institute, University Copenhagen, DK
Deconstructing evolutionary processes through the population palaeogenomics window
- Nov. 25** **Michael HOFREITER** University Potsdam, GER
How to get paleogenomes and what to do with them
- Dec. 02** **Annika GUSE** Centre for Organismal Studies, Heidelberg, GER
Molecular mechanisms of coral-algal endosymbiosis
- Dec. 09** **Ottmar KULLMER** Senckenberg Research Institute, Frankfurt, GER
The evolutionary paradox of tooth wear
- Jan. 20** **Alejandro BURGA** IMBA, ÖAW, Vienna, AUT
**On small wings and toxins:
What makes species and populations unique?**
- Jan. 27** **Miriam LIEDVOGEL** MPI Evolutionary Biology, Plön, GER
Bird migration - evolutionary genetics of migratory behavior
