# *Being a good supervisor*

WORKSHOP

by Friederike Range & Claus Lamm

**4th** of July  
2022

12:00-14:30h

UBB, 5<sup>th</sup> floor  
room 5.1

Part of being a scientist is to supervise students and help them to become good scientists themselves. But what is a good supervisor? And what can you do to become one? Are there certain rules to follow? Or is it all intuition? In this workshop, we will discuss several issues in an interactive setting. The aim is to provide you with a framework that will help you to supervise students (which will likely be part of your PhD or is already), keeping in mind that there are different styles of supervision and that we learn from each new experience how to get better at this task!

Limited number of participants. To register, please email [cogcom.office@univie.ac.at](mailto:cogcom.office@univie.ac.at)

hosted by DK Cognition and Communication 2
